

# Sumit Avasthi

Kanpur, Uttar Pradesh, India

Email | LinkedIn | GitHub | LeetCode | Portfolio

## CAREER SUMMARY

Computer Science undergraduate specializing in Data Science with strong problem-solving skills and a solid foundation in data structures, algorithms, and object-oriented programming. Experienced in building scalable full-stack applications using the MERN stack and developing data-driven solutions with Python. Passionate about creating efficient, real-world systems and seeking an opportunity to contribute to production-grade software development.

## EDUCATION

### B.Tech in Computer Science and Engineering (Data Science)

Pranveer Singh Institute of Technology, Kanpur

2023 – 2027

PERCENTAGE : 82.9%

### Senior Secondary Education

Kendriya Vidyalaya

2020 – 2022

Class 12: 81.4%, Class 10: 76.2%

## TECHNICAL SKILLS

|                       |                                                                                          |
|-----------------------|------------------------------------------------------------------------------------------|
| Programming Languages | C++, C, JavaScript (ES6+), Python                                                        |
| Core CS               | Data Structures & Algorithms, Problem Solving, OOP, DBMS, OS                             |
| Data Science          | Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Data Cleaning, EDA, Data Visualization |
| FULL-STACK            | HTML5, CSS, Node.js, Express.js, REST APIs, Authentication & Authorization               |
| Databases             | MongoDB, SQL                                                                             |
| Tools & Platforms     | Git, GitHub, Postman, Render, Vercel                                                     |

## PROJECTS

### WanderHub

GitHub | July 2025

- Built a full-stack travel platform enabling users to share experiences, discover destinations, and explore curated travel guides.
- Implemented user authentication, dynamic content rendering, and interactive UI components for a seamless experience..
- Demonstrated expertise in MERN stack development, REST API integration, and end-to-end web application design..
- Tools:** Node.js, Express.js, MongoDB, EJS, Cloudinary

### Delhi House Price Prediction

GitHub | Mar 2026

- Developed a machine learning model to predict house prices in Delhi based on features like area, BHK, locality, and furnishing status..
- Performed data cleaning and preprocessing by handling missing values, feature transformation, and dataset normalization. design.
- Conducted exploratory data analysis (EDA) using Matplotlib and Seaborn to identify trends and feature correlations. appeal.
- Tools Used:** Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Jupyter Notebook

### Connecto– Backend

GitHub | Feb 2026

- Built a MERN stack freelance marketplace platform enabling seamless interaction between clients and freelancers.
- Implemented JWT-based authentication and RESTful APIs to support secure login and role management for 2+ user types.
- Designed role-specific dashboards: clients can post jobs and freelancers can browse and apply to opportunities.
- Tools:** MongoDB, Express.js, React.js, Node.js

## COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- Solved 300+ DSA problems on LeetCode– demonstrates strong algorithmic problem-solving ability.
- Earned 5 Stars in C and C++ on HackerRank.
- Solved 200+ Problems on GeeksForGeeks.

## CERTIFICATIONS

Completed MERN Stack Development course  
Completed C++ Basic to Advanced course  
DSA Certification  
Python

Apna College | 2025  
GeeksForGeeks | 2024  
TakeYouForward | 2026  
HackerRank | 2026
